

NANLITE

LumiPad 11

- Soft Light LED Panel
- An impressively compact and bright soft light LED panel
- Adjustable color temperature from 3200-5600K
- Output 337 Lux of 5600K daylight-balanced light @1 meter
- Maximum output of 969 lumens
- 0 to 100% dimming

Studio Quality Lighting

NanLite LumiPad series LED panels create diffuse, color accurate, studio lighting with minimal set up and zero complications. Perfect for live streaming, vlogging, photography lighting, video lighting, photo booths and more.

Full Creative Control

Easily achieve beautiful results without adding plastic filters or cloth diffusion. The LumiPad 11's control knobs enable you to dial in brightness from 0-100% and temperature from warm to cold (3200K-5600K).

Slim Design and High Output

At only 1.2 inches thick and weighing just .5lbs the LumiPad 11 is a perfect carry everywhere light whether you are mounting it on camera or off.

Multiple Power Options

The LumiPad 11 can be powered by either an AC adapter (not included) or compatible Sony NP-F style batteries such as NP-F550 / F750 / F960 (Not Included) so you can operate in any location regardless power availability.
